

# Think small!

## The new Slimline power supply range

Now there's a power supply with all the features of its bigger brothers, but in an ultra-compact new design – the Slimline range.

### **Slim and Trim Yet Rugged and Reliable**

Robustly constructed from aluminium and engineering plastics for years of trouble free service, the Slimline range is constructed according to strict international and SABS standards. They offer all the rugged reliability of standard sized units while freeing up valuable desk space.

### **No one else offers these unique features**

- Ultra-compact design combined with rugged reliability
- Various desk mounting options available
- Compatible with VA, EFP and Timer modules
- Robust aluminium construction
- Wide range of colours and finishes available
- Conserves valuable desktop real-estate
- Dual circuit options available (clean and normal power)
- 90 degree swivel cable
- Up to 30 different international socket types available
