To Whom It May Concern

RE: Local Content of Power Logic Products

This letter serves to advise that the products made by Power Logic SA for the South African market presently have between a 90% to 100% local content rate (depending on the specification of the unit). That is to say, all components, raw materials and processes used in the manufacture of these products are sourced from local suppliers where possible. The only imported components are electronic components which are not available locally as well as certain engineering plastics which are required to meet international electrical standards and are not produced locally.

Our factory is based in Cape Town and employs 115 people in the manufacture and assembly of these products.

Please contact me if you require further information in this regard.

Yours sincerely,  
For Power Logic SA (Pty) Ltd

Adrian Mazzullo  
Managing Director
